10 **In re: Bextra and Celebrex Marketing Sales  
Practices and Product Liability Litigation**

MDL No. 1699

11 District Judge: Charles R. Breyer  
Magistrate:

CRB

12  
13 **DANIEL SILVER**, individually,  
**ROBERT HARING**, individually,  
**LORRAINE LEE**, individually,  
**CANDACE BERRY**, individually,  
**GUILLERMO SANS**, individually  
**ROBERT ALTADONNA**, individually,  
**DIANE DICRESCI**, individually,  
**CATHY BYRD**, individually,  
**DWILETTE HAYNES**, individually,  
14  
15  
16  
17

18 Plaintiffs,

19 v.  
20  
21 **PFIZER, INC., PHARMACIA CORP., and  
G.D. SEARLE, LLC, (FKA G.D. SEARLE &  
CO.),**

22 Defendants.

CV 07 5704

CIVIL COMPLAINT

JURY TRIAL DEMANDED

CHAMBERS COPY

23 ABOVE NAMED PLAINTIFFS, individually, as distinct, individual Plaintiffs,  
24 pursuant to Pretrial Order 12, by and through counsel and pursuant to applicable law, brings this  
25 action against Defendants PFIZER, INC., PHARMACIA CORP., and G.D. SEARLE & CO.  
26 (hereafter "Defendants") and alleges as follows:  
27  
28

1       **I. PARTIES**

2           1. This is an action for damages arising from Defendants' design,  
3 manufacture, sale, testing, marketing, advertising, promotion, and/or distribution of the unsafe  
4 medication Valdecoxib, trade name BEXTRA® ("Bextra").

5           2. Plaintiffs are and were at all relevant times adult resident citizens of the  
6 United States, residing at the address in the City, State and County identified in Section IV(A)  
7 herein. ("Named Plaintiff's Home District"). The Named Plaintiff's Home District is proper for  
8 purposes of remand, transfer, and venue.

9           3. Defendant Pfizer, Inc. ("Pfizer") is a Delaware corporation with its  
10 principal place of business in New York. In 2003, Pfizer acquired Pharamcia for nearly  
11 \$60 billion. At all relevant times Pfizer and/or its predecessors in interest were engaged in the  
12 business of designing, testing, manufacturing, packaging, marketing, distributing, promoting, and  
13 selling the drug Valdecoxib, under the trade name Bextra in Named Plaintiff's Home District and  
14 nationwide.

15           4. Defendant Searle ("Searle") is a Delaware corporation with its principal  
16 place of business in Illinois. At all relevant times, Searle has been engaged in the business of  
17 marketing and selling Bextra nationwide and in Named Plaintiff's Home District. Searle is a  
18 subsidiary of Pfizer, acting as its agent and alter ego in all matters alleged within this Complaint.

19           5. Defendant Pharmacia ("Pharmacia") is a Delaware corporation with its  
20 principal place of business in New Jersey. At all relevant times, Pharmacia, and its predecessors  
21 in interest have been engaged in the business of designing, testing, manufacturing, packaging,  
22 marketing, distributing, promoting, and selling Bextra nationwide and in Named Plaintiff's Home  
23 District.

24       **II. JURISDICTION AND VENUE**

25           6. This is an action for damages, which exceeds seventy-five thousand dollars  
26 (\$75,000.00).

27           7. There is complete diversity of citizenship between the Plaintiff and  
28 Defendants. This Court has subject matter jurisdiction over this matter pursuant to 28 U.S.C.A.

1       § 1332 (diversity jurisdiction) because the amount in controversy exceeds \$75,000.00, and  
2 because there is complete diversity of citizenship between Plaintiff and Defendants.

3           8.       This action is being filed in the Northern District of California Pursuant to  
4 MDL 1699, Pretrial Order No. 2. However, venue is proper in the Named Plaintiff's Home  
5 District pursuant to Pretrial Order 12 and 28 U.S.C.A. § 1391. Defendants marketed, advertised  
6 and distributed the dangerous product in the Named Plaintiff's Home District, thereby receiving  
7 substantial financial benefit and profits the dangerous product in the Name Plaintiff's Home  
8 District, and reside in the Named Plaintiff's Home District under 28 U.S.C.A. § 1391(c), such that  
9 venue is proper.

10          9.       At all relevant times herein, Defendants were in the business of designing,  
11 manufacturing, marketing, developing, testing, labeling, promoting, distributing, warranting and  
12 selling their product, Bextra. Defendants at all times relevant hereto designed, developed,  
13 manufactured, promoted, marketed, distributed, tested, warranted and sold in interstate commerce  
14 (including Named Plaintiff's Home District) the aforementioned prescription drug. Defendants  
15 do substantial business in the State of Named Plaintiff's Home District, advertise in the district,  
16 receive substantial compensation and profits from sales of Bextra in the District, and made  
17 material omissions and misrepresentations and breaches of warranties in the District so as to  
18 subject them to *in personam* jurisdiction in the District. In engaging in the conduct alleged herein  
19 each defendant acted as the agent for each of the other defendants, or those defendant's  
20 predecessors in interest.

### 21          **III. INTERDISTRICT ASSIGNMENT**

22          10.      Assignment to the San Francisco Division is proper as this action is related  
23 to *In Re: Bextra and Celebrex Marketing Sales Prac. and Pro. Liab. Lit.*, MDL-1699, assigned to  
24 the Honorable Charles R. Breyer by the Judicial Panel on Multidistrict Litigation on September 6,  
25 2005.

1       **IV. FACTUAL BACKGROUND**

2           **A. Facts Regarding Plaintiff**

3           11. Plaintiff DANIEL SILVER is an adult resident citizen of Florida, residing  
4 at 6037 Balboa Circle, Boca Raton, FL 33433. For purposes of remand, transfer and venue, this  
5 is in the Southern District of Florida. Plaintiff was prescribed, and began taking, Bextra on or  
6 about January 29, 2003. As a direct and proximate result of using Bextra, Plaintiff suffered  
7 severe cardiovascular injuries. Specifically, on or about March 1, 2004, Plaintiff suffered a heart  
8 attack, which caused Plaintiff's damages and injuries set forth herein.

9           12. Plaintiff ROBERT HARING is an adult resident citizen of Florida, residing  
10 at 5171 Goshawk Drive, Milton, FL 32570 in Santa Rosa County. For purposes of remand,  
11 transfer and venue, this is in the Northern District of Florida. Plaintiff was prescribed, and began  
12 taking, Bextra on or about November 11, 2002. As a direct and proximate result of using Bextra,  
13 Plaintiff suffered severe cardiovascular injuries. Specifically, on or about March 15, 2004,  
14 Plaintiff suffered a stroke, which caused Plaintiff's damages and injuries set forth herein.

15           13. Plaintiff LORRAINE LEE is an adult resident citizen of Florida, residing at  
16 1510 West Ariana, Lot 432, Lakeland, FL 33803. For purposes of remand, transfer and venue,  
17 this is in the Middle District of Florida. Plaintiff was prescribed, and began taking, Bextra on or  
18 about September 9, 2002. As a direct and proximate result of using Bextra, Plaintiff suffered  
19 severe cardiovascular injuries. Specifically, on or about June 5, 2004, Plaintiff suffered a heart  
20 attack, which caused Plaintiff's damages and injuries set forth herein.

21           14. Plaintiff CANDACE BERRY is an adult resident citizen of South Carolina,  
22 residing at 174 Berry Hill Lane, Gaston, SC 29053. For purposes of remand, transfer and venue,  
23 this is in the District of South Carolina. Plaintiff was prescribed, and began taking, Bextra on or  
24 about December 10, 2002. As a direct and proximate result of using Bextra, Plaintiff suffered  
25 severe cardiovascular injuries. Specifically, on or about May 21, 2003, Plaintiff suffered a heart  
26 attack, which caused Plaintiff's damages and injuries set forth herein.

27           15. Plaintiff GUILLERNO SANS is an adult resident citizen of Florida,  
28 residing at 16280 Trafalgar Drive, Loxahatchee, FL 33470. For purposes of remand, transfer and

1 venue, this is in the Southern District of Florida. Plaintiff was prescribed, and began taking,  
2 Bextra on or about March 5, 2003. As a direct and proximate result of using Bextra, Plaintiff  
3 suffered severe cardiovascular injuries. Specifically, during January and/or February, 2004  
4 Plaintiff suffered angina and various other cardiovascular injuries on or about the following dates:  
5 August 4, 2004, October 16, 2004, and March 23, 2005, which caused Plaintiff's damages and  
6 injuries set forth herein.

7 16. Plaintiff ROBERT ALTADONNA is an adult resident citizen of Florida,  
8 residing at 1120 Boxwood Drive, No. 204, Delray Beach, FL 33445. For purposes of remand,  
9 transfer and venue, this is in the Southern District of Florida. Plaintiff was prescribed, and began  
10 taking, Bextra on or about December 22, 2002. As a direct and proximate result of using Bextra,  
11 Plaintiff suffered severe cardiovascular injuries. Specifically, January 2004 and/or on or about  
12 February 3, 2004 and/or on or about February 24, 2004, Plaintiff suffered a stroke, which caused  
13 Plaintiff's damages and injuries set forth herein.

14 17. Plaintiff DIANE DICRESCI is an adult resident citizen of Florida, residing  
15 at 420 Seaside Lane, Juno Beach, FL 33408. For purposes of remand, transfer and venue, this is  
16 in the Southern District of Florida. Plaintiff was prescribed, and began taking, Bextra on or about  
17 May 1, 2003. As a direct and proximate result of using Bextra, Plaintiff suffered severe  
18 cardiovascular injuries. Specifically, on or about May 30, 2004, Plaintiff suffered a stroke, which  
19 caused Plaintiff's damages and injuries set forth herein.

20 18. Plaintiff CATHY BYRD is an adult resident citizen of Arkansas, residing  
21 at 2409 Zion Road, Fayetteville, AR 72703. For purposes of remand, transfer and venue, this is  
22 in the Western District of Arkansas. Plaintiff was prescribed, and began taking, Bextra on or  
23 about the month of October, 2002. As a direct and proximate result of using Bextra, Plaintiff  
24 suffered severe cardiovascular injuries. Specifically, on or about one and/or several of the  
25 following dates February 17, 2003, the month of February 2005 and/or September 2006, Plaintiff  
26 suffered a heart attack, which caused Plaintiff's damages and injuries set forth herein.

27 19. Plaintiff DWILETTE HAYNES is an adult resident citizen of Mississippi,  
28 residing at P.O. Box 52, Lyon, MS 38645 in Coahoma County. For purposes of remand, transfer

1 and venue, this is in the Northern District of Mississippi. Plaintiff was prescribed, and began  
 2 taking, Bextra on or before October 14, 2002. As a direct and proximate result of using Bextra,  
 3 Plaintiff suffered severe cardiovascular injuries. Specifically, on or about the month of May,  
 4 2004, Plaintiff suffered a stroke, which caused Plaintiff's damages and injuries set forth herein.

5 20. Unaware of the risks presented by Bextra, or that Bextra was the cause of  
 6 their respective injuries, Plaintiff continued to take Bextra.

7 21. Plaintiff and Plaintiff's healthcare providers were at the time of Plaintiff's  
 8 adverse cardiovascular event unaware—and could not have reasonably known or have learned  
 9 through reasonable diligence—that such injury directly resulted from Defendants' negligence and  
 10 otherwise culpable acts, omissions, and misrepresentations or from Plaintiff's ingestion of Bextra.

11 22. Plaintiff used Bextra in a proper and reasonably foreseeable manner and  
 12 used it in a condition that was substantially the same as the condition in which it was  
 13 manufactured and sold.

14 23. Plaintiff would not have used Bextra had Defendants properly disclosed the  
 15 risks associated with the drug.

#### Estate Claim Pleadings and Damages

17 24. As a result of Defendants' actions, Plaintiff, Decedent, and the Decedent's  
 18 prescribing physicians were unaware, and could not have reasonably known or have learned  
 19 through reasonable diligence, that the Plaintiff and/or Decedent had been exposed to the risks  
 20 identified in this complaint, and that those risks were the direct and proximate result of  
 21 Defendants' acts, omissions, and misrepresentations. Decedent died, leaving survivors as defined  
 22 by law who incurred the following damages:

23 a. Decedent sustained serious cardiovascular injuries and death.  
 24 Decedent required healthcare and services incurring direct medical losses and costs including care  
 25 for hospitalization, physician care, monitoring, treatment, medications, and supplies.

26 b. Plaintiff, as the surviving spouse of Decedent, suffered a loss of  
 27 support and services and endured mental pain and suffering and loss of consortium. The losses  
 28 are permanent and continuing in nature.

c. The surviving children of Decedent suffered a loss of support and services and endured mental pain and suffering and loss of consortium of their parent. The losses are permanent and continuing in nature.

d. In addition, the Estate of the Decedent suffered a loss of net accumulations due to the premature death of Decedent, and the personal representative incurred medical and funeral expenses for the burial and funeral services of the deceased.

e. Defendants' conduct as described above was committed with knowing, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers such as Decedent, thereby entitling Plaintiff to punitive damages so as to punish Defendant and deter it from similar conduct in the future.

25. WHEREFORE, Plaintiff demands judgment against Defendants and seeks compensatory damages, and exemplary and punitive damages together with interest, the costs of suit and attorneys' fees and such other and further relief as this Court deems just and proper.

## **B. Facts Regarding Bextra**

26. Bextra is one of a class of pain medications called non-steroidal anti-inflammatory drugs (“NSAIDs”). Aspirin, naproxen (trade name Aleve), and ibuprofen (trade name Advil) are examples of well-known NSAIDs.

27. NSAIDs reduce pain by blocking the body's production of pain transmission enzymes called cyclo-oxygenase or "COX." There are two forms of COX enzymes—COX-1 and COX-2. Aspirin, naproxen and ibuprofen all act by blocking COX-1 and COX-2 enzymes.

28. In addition to decreasing inflammation, the prostaglandins that are supported by COX-1 enzymes are involved in the production of gastric mucus; this protects the stomach wall from the hydrochloric acid present in the stomach. It is generally accepted in the medical community that by blocking the COX-1 enzyme, the body's ability to protect gastric tissue is hampered and as a result, can cause harmful gastrointestinal side effects, including stomach ulceration and bleeding. Prostaglandin I<sub>2</sub> is the predominant cyclooxygenase product in

1 endothelium, inhibiting platelet aggregation (preventing clot formation), causing vasodilation, and  
2 preventing the proliferation of vascular smooth muscle. Whereas older NSAIDS inhibit  
3 Thromboxane A2 and Prostaglandin I2, the COX-2 inhibitors leave Thromboxane A2 unaffected.  
4 Thromboxane A2 is a potent platelet aggregator and vasoconstrictor which is synthesized by  
5 platelets. Therefore, while the older NSAIDS suppress platelet aggregation and vasoconstriction,  
6 the COX-2 inhibitors support it. Traditional NSAIDs like aspirin reduce pain/inflammation and  
7 therefore pain by inhibiting both COX-1 and COX-2 enzymes simultaneously. As would be  
8 expected, traditional NSAIDs may cause ulcers in the stomach. However, traditional NSAIDs do  
9 not cause blood clots, rather they actually reduce the risk of clots and help protect heart function.

10           29. Defendants and other pharmaceutical companies set out to remedy these  
11 ulcer and bleeding problems suffered by some NSAID users by developing “selective” inhibitors  
12 that would block only COX-2 production, thus (supposedly) allowing the proper maintenance of  
13 gastric tissue while still reducing inflammation.

14           30. In making this decision, Defendants and their predecessors in interest either  
15 intentionally ignored or recklessly disregarded current medical knowledge that selective COX-2  
16 inhibition lowers prostacyclin levels and causes thromboxane A<sub>2</sub> to be uninhibited, causing blood  
17 clots, and giving rise to various clot-related cardiovascular events, including heart attack, stroke,  
18 unstable angina. The vasoconstriction and fluid retention cause the hypertension.

19           31. The defendants launched Celebrex, the first of the three major COX-2  
20 inhibitor drugs, in early 1999 and initiated a massive marketing campaign to convince doctors and  
21 consumers of the superiority of their new “blockbuster” drug over less inexpensive NSAIDs. In  
22 May, 1999, Merck & Co., Inc. (“Merck”) launched Vioxx, its own selective COX-2 inhibitor.

23           32. Seeking increased market share in this extremely lucrative market,  
24 Defendants, and their predecessors in interest, also sought approval of a “second generation”  
25 selective COX-2 inhibitor and filed for FDA approval of Bextra on January 16, 2001 for the  
26 (i) prevention and treatment of acute pain, (ii) treatment of primary dysmenorrhea, and (iii) relief  
27 of the signs and symptoms of osteoarthritis and adult rheumatoid arthritis.

28

1           33.     The FDA granted approval of the new drug on November 16, 2001, for two  
2 particular uses: (i) treatment of primary dysmenorrhea and (ii) relief for the signs and symptoms  
3 of osteoarthritis and rheumatoid arthritis.

4           34.     The FDA did not grant approval to market and promote Bextra for the  
5 management or prevention of acute pain.

6           35.     The FDA did not grant approval to promote Bextra as more effective than  
7 other NSAIDs in preventing clinically serious gastrointestinal events such as perforations, ulcers or  
8 gastric bleeding.

9           36.     Even without a label that allowed Defendants to legitimately claim superior  
10 safety, when Defendants, and their predecessors-in-interest, began marketing Bextra in early 2002,  
11 Defendants and their representatives and agents misrepresented the safety profile of Bextra to  
12 consumers, the medical community, healthcare providers, and third party payors. Defendants  
13 proceeded to promote, market, sell, and distribute Bextra as a much safer and more effective pain  
14 reliever than other NSAIDs, such as aspirin, naproxen, and ibuprofen.

15           **C.     Facts Regarding Bextra's Safety**

16           37.     The potential for cardiovascular risk of selective COX-2 inhibitors was  
17 known to Defendants long before the FDA granted market approval for Bextra. By 1997, and  
18 prior to the submission of the New Drug Application (the "NDA") for Bextra, Defendants were  
19 aware that, by inhibiting COX-2, Bextra altered the homeostatic balance between prostacyclin  
20 synthesis and thromboxane and thereby, increased the prothrombotic effects of the drugs, causing  
21 blood clots to form in those who ingested it. *See Topol, E.J., et al., Risk of Cardiovascular*  
22 *Events Associated with Selective Cox-2 Inhibitors, JAMA, August 22, 2001 at 954.* Although all  
23 COX-2 inhibitors have this mechanism of action, Bextra was the most selective COX-2 inhibitor  
24 proposed for approval. Accordingly, it had the greatest potential to cause adverse cardiovascular  
25 and cerebrovascular events.

26           38.     As Pharmacologist, Dr. Garrett Fitzgerald, of the University of  
27 Pennsylvania, reported in an editorial published in *The New England Journal of Medicine* on  
28 October 21, 2004, that it was known as early as 1999 that selective COX-2 inhibitors, such as

1 Bextra, suppressed the formation of prostaglandin I-2 in healthy volunteers, inhibited platelet  
2 aggregation in vitro, and may predispose patients to myocardial infarction or thrombotic stroke.

3       39. Nevertheless, the Defendants submitted an NDA to the FDA for Bextra,  
4 omitting information about the extent of the risks associated with Bextra. Without a complete  
5 picture of the potential hazards associated with the drug, the FDA approved Bextra on or about  
6 November 16, 2001.

7       40. Based on the studies performed on Bextra, other COX-2 inhibitors, and  
8 basic research on this type of selective inhibitor which had been widely conducted, Defendants  
9 knew when Bextra was being developed and tested that selective COX-2 inhibitors posed serious  
10 cardiovascular risks for anyone who took them, and presented a specific additional threat to  
11 anyone with existing heart disease or cardiovascular risk factors.

12       41. Studies show that selective COX-2 inhibitors, including Bextra, decrease  
13 blood levels of a prostacyclin. When those levels fall, the arteries are more vulnerable to clotting,  
14 high blood pressure, heart attack, and stroke.

15       42. The defendants marketed Bextra in the United States for three years (April,  
16 2002 – April 7, 2004). During that time the FDA forced the defendants to strengthen the warning  
17 label several times. The enhanced warnings followed in the wake of the results of additional  
18 cardiovascular studies performed by Defendants, as well as numerous complaints to the FDA  
19 regarding various adverse events.

20       43. Prior to strengthening the warning for Bextra, Defendants had knowledge  
21 of the coronary and cardiovascular safety risks of Bextra from several studies. See e.g., Otto,  
22 E.O., *Efficacy and Safety of the Cyclooxygenase 2 Inhibitors Parecoxib and Valdecoxib in*  
23 *Patients Undergoing Coronary Artery Bypass Surgery, The Journal of Thoracic and*  
24 *Cardiovascular Surgery*, June 2003 at 1481.

25       44. Even Defendants' own (and Pfizer funded) post- drug approval meta-  
26 analysis study (first presented on March 31, 2003 and again on May 15, 2003) included this data  
27 showing an increased cardiovascular risk in patients treated with Bextra after undergoing  
28 coronary artery bypass graft surgery. Observed events included heart attack, stroke, and blood

1 clots in the legs and lungs. The results were particularly relevant and striking as each of the study  
2 participants who was a post-bypass surgery patient was taking anti-clotting agents at the time  
3 their exposure to Bextra was being tracked.

4 45. In mid-January 2005, a peer-reviewed paper from the University of  
5 Pennsylvania found that in patients having heart bypass surgery, those who took Bextra in the  
6 intravenous form, parecoxib, as opposed to a placebo, were three times more likely to have a  
7 heart attack or stroke.

8 46. Despite years of studies on selective COX-2 inhibitors, as well as the  
9 disturbing new studies specifically analyzing the risks of Bextra, Defendants failed to take any  
10 action to protect the health and welfare of patients, but instead, continued to promote the drug for  
11 sale even after the FDA's Drug Safety and Risk Management Advisory Committee and Arthritis  
12 Drug Advisory Committee meetings.

13 47. On April 7, 2005, the FDA finally insisted that Defendants "voluntarily  
14 withdraw" Bextra from the U.S. market, stating:

15 . . . the Agency has concluded that the overall risk versus benefit  
16 profile of Bextra is unfavorable. This conclusion is based on the  
17 potential increased risk for serious cardiovascular (CV) adverse  
18 events, which appears to be a class effect of non-steroidal anti-  
inflammatory drugs (NSAIDs) (excluding aspirin) . . . and the fact  
19 that Bextra has not been shown to offer any unique advantage over  
the other available NSAIDs. (FDA Alert for Healthcare  
Professionals, April 7, 2005.)

20 48. Continuing, the FDA noted:

21 Bextra has been demonstrated to be associated with an increased  
22 risk of serious adverse CV events in two short-term trials in patients  
immediately post-operative from coronary artery bypass graft  
23 (CABG) surgery . . . FDA has concluded that it is reasonable to  
extrapolate the adverse CV risk information for Bextra from the  
short-term CABG trials to chronic use given the fact that other  
24 COX-2 selective NSAIDs have been shown in long-term controlled  
clinical trials to be associated with an increased risk of serious  
adverse CV events (e.g., death, MI, stroke), and the well described  
25 risk of serious, and often life-threatening gastrointestinal  
bleeding . . . To date, there have been no studies that demonstrate  
an advantage of Bextra over other NSAIDs that might offset the  
concern about the serious skin risks, such as studies that show a GI  
26 safety benefit, better efficacy compared to other products, or  
efficacy in a setting of patients who are refractory to treatment with  
27 other products."

49. Dr. Garret A. Fitzgerald, cardiologist and pharmacologist at the University of Pennsylvania, presented the preliminary results of his Bextra study at the American Heart Association meeting in New Orleans, Louisiana. His study, containing 12 trials including 5,930 patients, found 2.19 times the number of strokes among patients given Bextra. *Named Plaintiff's Home District Times*, Nov. 10, 2004.

50. Instead of studying Bextra prior to its market launch, the Defendants simply relied upon data and information gathered from Celebrex trials and studies. The Celebrex data put Pfizer on notice that Cox-2 NSAIDs are, at the very least, associated with a disproportionately increased number of adverse cardiovascular events. Taking the results from the Celebrex trials in conjunction with the available medical literature; the Defendants knew about the increased incidence and association between Bextra and the potentially life-threatening dangers it could cause.

51. The Named Plaintiff's Home District Times uncovered the truth about the inadequate studies by interviewing Pfizer researcher Dr. Feczko - Pfizer's president for worldwide development.

Over all, Pfizer has performed much less research on Bextra than on Celebrex, Dr. Feczko said. Most of the company's studies of Bextra have been short term, with many lasting only two weeks. As a result, Pfizer has less data to support its contention that Bextra is safe , he said.

\* \* \*

Dr. Feczko of Pfizer explained that the company felt it was not as important to study Bextra extensively because the company believed that the drug was similar to Celebrex.

*The Named Plaintiff's Home District Times, February 5, 2005.*

52. The Celebrex data relied upon by the Defendants was not adequate. On July 23, 2005, the New England Journal of Medicine published the results of its investigative research noting: "Most data on the cardiovascular risks associated with celecoxib have come from observational studies or short-term randomized trials." N. ENG. J. MED. 352;25 at 2649.

53. On December 23, 2004, three (3) researchers from the well-respected

1 Vanderbilt University published an article in the New England Journal of Medicine. The doctors  
2 wrote: "To protect the safety of the public, we write to recommend that clinicians stop prescribing  
3 Valdecoxib (Bextra) except in extraordinary circumstances." N. ENG. J. MED. 351;26. The  
4 authors cite to two (2) recent studies "which showed a 3-fold increase in serious cardiovascular  
5 injuries in patients receiving Valdecoxib after coronary-artery bypass grafting." Later, on  
6 February 17, 2005, the New England Journal of Medicine published the results of a study  
7 conducted by eight (8) doctors with similarly alarming results. N. ENG. J. MED. 2005;352.

8 54. In January 2005, Drs. Fitzgerald, Furberg and Psaty published an editorial  
9 in *Circulation*, the official journal of the American Heart Association. This editorial was based  
10 on a meta-analysis of two (2) clinical studies, and discusses the association between intravenous  
11 administration of an identical drug, and oral administration of Bextra. All three doctors found a  
12 "3-fold higher risk of cardiovascular injuries with the drug than with a placebo." *Cir.* 2005;  
13 111:249.

14 55. The scientific data available during and after Bextra's approval process  
15 made clear to Defendants that their formulation of Bextra would cause a higher risk of blood  
16 clots, stroke and/or myocardial infarctions among Bextra consumers, alerting them to the need to  
17 do additional and adequate safety studies.

18 56. As stated by Dr. Topol on October 21, 2004, in *The New England Journal*  
19 *of Medicine*, outlining Defendants' failure to have conducted the necessary trials before  
20 marketing to humans "... it is mandatory to conduct a trial specifically assessing cardiovascular  
21 risk and benefit of (COX-2 inhibitors). Such a trial needed to be conducted in patients with  
22 established coronary artery disease, who frequently have coexisting osteoarthritis requiring  
23 medication and have the highest risk of further cardiovascular events."

24 57. Dr. Topol was also the author on the study published in August 2001 in  
25 JAMA (listed above) that reported an increased risk of thrombotic cardiovascular events in  
26 persons who used COX-2 inhibitors.

27 58. Based upon readily available scientific data, Defendants knew, or should  
28 have known, that their pre-approval testing of Bextra did not adequately represent the cross-

1 section of individuals who were intended consumers and therefore, likely to take Bextra.  
2 Therefore, Defendants' testing and studies were grossly inadequate. *See, e.g.*, PDR entry for  
3 Bextra (noting that: "Platelets: In four clinical studies with young and elderly ( $\geq 65$  years)  
4 subjects, single and multiple doses up to 7 day mg BID had not effect on platelet aggregation").

5 59. Had Defendants done adequate testing prior to approval and "market  
6 launch," rather than the extremely short duration studies done on the small size patient base that  
7 was actually done) Pharmacia and Searle's scientific data would have revealed significant  
8 increases in incidence of strokes and myocardial infarctions among the intended and targeted  
9 population of Bextra consumers. Adequate testing would have shown that Bextra possessed  
10 serious side effects. Defendants should have taken appropriate measures to ensure that their  
11 defectively designed product would not be placed in the stream of commerce and/or should have  
12 provided full and proper warnings accurately and fully reflecting the scope and severity of  
13 symptoms of those side effects should have been made.

14 60. In fact, post-market approval data did reveal increased risks of clotting,  
15 stroke and myocardial infarction, but Defendants intentionally suppressed this information in  
16 order for them to gain significant profits from continued Bextra sales.

17 61. Defendants' failure to conduct adequate testing and/or additional testing  
18 prior to "market launch" was based upon their desire to generate maximum financial gains for  
19 themselves and to gain a significant market share in the lucrative multi-billion dollar COX-2  
20 inhibitor market. At the time Defendants manufactured, advertising, and distributed Bextra to  
21 consumers, Defendants intentionally or recklessly ignored and/or withheld information regarding  
22 the increased risks of hypertension, stroke and/or myocardial infarctions because Defendants  
23 knew that if such increased risks were disclosed, consumers would not purchase Bextra, but  
24 instead would purchase other cheaper and safer NSAIDs.

25 **D. Facts Regarding Defendants' Marketing and Sale of Bextra**

26 62. The defendants rushed Bextra to the market in an effort to regain Cox-2  
27 market share. In response to the introduction of Vioxx, and without performing adequate  
28 research, the Defendants hastily introduced their own more selective Cox-2 inhibitor, Bextra, to

1 the market. In doing so, Pfizer, admittedly, relied upon problematic research results from its  
 2 study of Celebrex.

3           63. Pfizer stuck to its original plan – focus on marketing and avoid studying  
 4 Bextra. Thus, it was reported: “The positioning for Bextra began more than a year and a half  
 5 before it hit the market. Pharmacia conducted research about the arthritis market to examine gaps  
 6 in treatment, said Sylvia McBrinn, Pharmacia’s Vice President for global marketing for Bextra.”<sup>1</sup>  
 7 Bextra’s marketing research was conducted over a year and a half, while science took a backseat,  
 8 with one small study for Bextra lasting not even one year and the rest lasting only weeks in  
 9 duration.

10           64. At all times relevant herein, Defendants engaged in a marketing campaign  
 11 with the intent that consumers would perceive Bextra as a safer and better drug than its other  
 12 NSAIDs and, therefore, purchase Bextra.

13           65. Such an ineffective and unreasonably dangerous drug could only be widely  
 14 prescribed as a result of a tremendous marketing campaign. In addition to being aggressive, the  
 15 Defendants’ marketing campaign was fraudulent and misleading. But for fraudulent and  
 16 misleading advertising, consumers would not have purchased Bextra, a more costly prescriptive  
 17 drug, that was not effective for its intended purposes.

18           66. On January 10, 2005 the FDA issued Pfizer a written reprimand for its  
 19 promotional activities. The reprimand reads: “These five promotional pieces [3 Celebrex and 2  
 20 Bextra] variously: omit material facts … and make misleading safety, unsubstantiated superiority,  
 21 and unsubstantiated effectiveness claims.” This was not the Defendants first offense related to its  
 22 Cox-2 inhibitors. The FDA also reprimanded Pfizer on October 6, 1999 noting: “DDMAC has  
 23 reviewed these promotional pieces and has determined that they are false or misleading because  
 24 they contain unsubstantiated comparative claims, misrepresentations of Celebrex’s safety profile,  
 25 and are lacking in fair balance.”

26           67. Bextra was never approved for the treatment of acute pain. Without such  
 27 approval, Pfizer was prohibited from marketing Bextra for such an indication. Nevertheless, in

---

28 <sup>1</sup> *New Jersey Record*, North Jersey Media Group, Inc., April 14, 2002.

1 May of 2002, Pfizer issued a press release announcing the publication of a study in the Journal of  
 2 the American Dental Ass'n (JADA) concluding that Bextra is effective in the treatment of acute  
 3 pain associated with dental surgery. Interestingly, the dental study was sponsored by the  
 4 defendants and three of the five authors were employees of Pharmacia.

5       68. Essentially, Pfizer was attempting to circumvent the FDA by promoting a  
 6 study it funded and authored for an unapproved use. Once the results were published, Pfizer's  
 7 aggressive promotional campaign continued. Pfizer issued a press release touting Bextra's  
 8 efficacy for the treatment of acute pain. After the press release, Dr. Steve Geis, Group Vice  
 9 President of Clinical Research was reported to have said the following: "Post-surgical pain can be  
 10 under-managed and cause patients tremendous discomfort. ... This investigational study suggests  
 11 that Bextra may offer promise in acute pain management and further study is required."<sup>2</sup>

12       69. Defendants widely and successfully marketed Bextra throughout the  
 13 United States by, among other things, conducting promotional campaigns that misrepresented the  
 14 efficacy of Bextra in order to induce a widespread use and consumption. Bextra was represented  
 15 to aid the pain and discomfort of arthritis, osteoarthritis, and related problems. Defendants made  
 16 misrepresentations by means of media advertisements, and statements contained in sales literature  
 17 provided to Plaintiff's prescribing physicians.

18       70. Despite knowledge of the dangers presented by Bextra, Defendants and  
 19 Defendants' predecessors in interest, through their officers, directors and managing agents for the  
 20 purpose of increasing sales and enhancing its profits, knowingly and deliberately failed to remedy  
 21 the known defects of Defendants' product, Bextra, and failed to warn the public, including  
 22 Plaintiff, of the serious risk of injury occasioned by the defects inherent in Defendants' product,  
 23 Bextra. Defendants and their officers, agents and managers intentionally proceeded with the  
 24 inadequate safety testing, and then the manufacturing, sale and marketing of Defendants' product,  
 25 Bextra, knowing that persons would be exposed to serious potential danger, in order to advance  
 26 their own pecuniary interests. Defendants' conduct was wanton and willful, and displayed a  
 27 conscious disregard for the safety of the public and particularly of Plaintiff.

---

28 <sup>2</sup> Press Release: docguide.com March 25, 2002.

1           71. In an elaborate and sophisticated manner, Defendants aggressively  
2 marketed Bextra directly to consumers and medical professionals (including physicians and  
3 leading medical scholars) in order to leverage pressure on third party payors, medical care  
4 organizations, and large institutional buyers (*e.g.*, hospitals) to include Bextra on their  
5 formularies. Faced with the increased demand for the drug by consumers and health care  
6 professionals that resulted from Defendants' successful advertising and marketing blitz, third  
7 party payors were compelled to add Bextra to their formularies. Defendants' marketing campaign  
8 specifically targeted third party payors, physicians, and consumers, and was designed to convince  
9 them of both the therapeutic and economic value of Bextra.

10           72. Defendants represented that Bextra was similar to ibuprofen and naproxen  
11 but was superior because it lacked any of the common gastrointestinal adverse side effects  
12 associated with these and other non-steroidal anti-inflammatory drugs ("NSAIDS"). For instance,  
13 NSAIDS can, in certain patients, cause gastrointestinal perforations, ulcers and bleeding with  
14 long-term use. Defendants promoted Bextra as a safe and effective alternative that would not  
15 have the same deleterious and painful impact on the gut, but that would be just as effective, if not  
16 more so, for pain relief.

17           73. Bextra possessed dangerous and concealed or undisclosed side effects,  
18 including the increased risk of serious cardiovascular events, such as heart attacks, unstable  
19 angina, cardiac clotting, deep vein thrombosis, hypertension, and cerebrovascular events, such as  
20 strokes. In addition, Bextra was no more effective than traditional and less expensive NSAIDs  
21 and, just like traditional NSAIDs, carried a risk of perforations, ulcers, and gastrointestinal  
22 bleeding. Defendants chose not to warn about these risks and dangers.

23           74. Defendants knew of these risks before the U.S. Food and Drug  
24 Administration (the "FDA") approved Bextra for sale on November 16, 2001, but Defendants  
25 ignored, downplayed, suppressed, omitted, and concealed these serious safety risks and denied  
26 inefficacy in its promotion, advertising, marketing, and sale of Bextra. Defendants' omission,  
27 suppression, and concealment of this important information enabled Bextra to be sold to, and  
28 purchased, or paid for by, the Consumers at a grossly inflated price.

1           75. Consequently, Bextra captured a large market share of anti-inflammatory  
2 drugs prescribed for and used by patients. In 2004 alone sales of Bextra exceeded \$1 billion,  
3 despite the significantly higher cost of Bextra as compared to other pain relievers in the same  
4 family of drugs.

5           76. Because Defendants engaged in a promotional and marketing campaign  
6 that featured an advertising blitz directly targeted to consumers, that touted Bextra as a safer drug  
7 than other drugs in its class, while uniformly failing to disclose the health risks of Bextra,  
8 Defendants were able to justify pricing Bextra significantly higher than the cost of generic  
9 aspirin. In reality, that price inflation was not justified. Had Defendants disclosed the truth about  
10 Bextra, Defendants would not and could not have reaped the billions of dollars in Bextra sales  
11 that were achieved as a direct result of the concealment, omission, suppression, and obfuscation  
12 of the truth.

13           77. Instead of revealing the risks of Bextra, Defendants intentionally  
14 downplayed the risks from Bextra in news releases when Bextra's safety was challenged for the  
15 first time in the mainstream media. *See e.g.*, Nov. 10, 2004 Pfizer News Release ("Pfizer Inc.  
16 said a Named Plaintiff's Home District Times article published today draws unsubstantiated  
17 conclusions about the cardiovascular safety of its Cox-2 medicine Bextra . . ."). Defendants  
18 similarly had earlier downplayed the risks in communicating to healthcare providers misleadingly  
19 stating that "available clinical information for Bextra suggests there is no increased risk of  
20 cardiovascular thromboembolic events in people treated for osteoarthritis (OA) and rheumatoid  
21 arthritis (RA)" Oct. 15, 2004 *Pfizer News Release*. Defendants intentionally, deliberately,  
22 knowingly, and actively concealed, omitted, suppressed, and obfuscated important and material  
23 information regarding the risks, dangers, defects, and disadvantages of Bextra from Plaintiff, the  
24 public, the medical community, and the regulators. This concealment and omission was  
25 deliberate, knowing, active, and uniform, was intended to induce and maximize sales and  
26 purchases of Bextra, and prevented Plaintiff from obtaining all the material information that  
27 would be important to their decisions as reasonable persons to purchase, pay for, and/or use  
28 Bextra.

1           78. Defendants' systematic, active, knowing, deliberate, and uniform  
2 concealment, omissions, suppression, and conduct caused Plaintiff to purchase, pay for, and/or  
3 use Bextra; and caused Plaintiff's losses and damages as asserted herein.

4           79. Had Defendants done adequate testing prior to approval and "market  
5 launch," Pharmacia's scientific data would have revealed significant increases in stroke and  
6 myocardial infarction amongst the intended population of Bextra consumers. Adequate testing  
7 would have shown that Bextra possessed serious side effects. Defendants should have taken  
8 appropriate measures to ensure that their defectively designed product would not be placed in the  
9 stream of commerce and/or should have provided full and proper warnings accurately and fully  
10 reflecting the scope and severity of symptoms of those side effects should have been made.

11          80. In fact, post-market approval data did reveal increased risks of clotting,  
12 stroke and myocardial infarction, but this information was intentionally suppressed by Defendants  
13 in order for them to gain significant profits from continued Bextra sales.

14          81. Defendants' failure to conduct adequate testing and/or additional testing  
15 prior to "market launch" was based upon their desire to generate maximum financial gains for  
16 themselves and to gain a significant market share in the lucrative multi-billion dollar COX-2  
17 inhibitor market.

18          82. At the time Defendants manufactured, advertising, and distributed Bextra  
19 to consumers, Defendants intentionally or recklessly ignored and/or withheld information  
20 regarding the increased risks of hypertension, stroke and/or myocardial infarctions because  
21 Defendants knew that if such increased risks were disclosed, consumers would not purchase  
22 Bextra, but instead would purchase other cheaper and safer NSAID drugs.

23          83. At all times relevant herein, Defendants engaged in a marketing campaign  
24 with the intent that consumers would perceive Bextra as a better drug than its competitors and,  
25 therefore, purchase Bextra.

## CLAIMS FOR RELIEF

**FIRST CLAIM FOR RELIEF:**  
**Negligence**

84. Plaintiff incorporates by reference all of the paragraphs of this Complaint as if fully set forth herein.

85. Defendants owed Plaintiff a duty to exercise reasonable care when designing, manufacturing, marketing, advertising, distributing, and selling Bextra. This duty included the duty not to introduce a pharmaceutical drug, such as Bextra, into the stream of commerce that caused users to suffer from unreasonable, dangerous or untoward adverse side effects.

86. At all relevant times to this action, Defendants owed a duty to properly warn Plaintiff and the Public of the risks, dangers and adverse side effects of their pharmaceutical drug Bextra.

87. Defendants breached their duties by failing to exercise ordinary care in the preparation, design, research, testing, development, manufacturing, inspection, labeling, marketing, promotion, advertising and selling of Bextra, including:

a. failing to use due care in the preparation and development of Bextra to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

b. failing to use due care in the design of Bextra to prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

c. failing to conduct adequate pre-clinical testing and research to determine the safety of Bextra;

d. failing to conduct adequate post-marketing surveillance and

exposure studies to determine the safety of Bextra;

e. failing to completely, accurately and in a timely fashion, disclose the results of the pre-marketing testing and post-marketing surveillance and testing to Plaintiff, consumers, the medical community, and the FDA;

1 f. failing to accompany Bextra with proper warnings regarding all  
2 possible adverse side effects associated with the use of Bextra;

3 g. failing to use due care in the manufacture, inspection, and labeling  
4 of Bextra to prevent the aforementioned risk of injuries to individuals who used Bextra;

5 h. failing to use due care in the promotion of Bextra to prevent the  
6 aforementioned risk of injuries to individuals when the drugs were ingested;

7 i. failing to use due care in the sale and marketing of Bextra to  
8 prevent the aforementioned risk of injuries to individuals when the drugs were ingested;

9 j. failing to use due care in the selling of Bextra to prevent the  
10 aforementioned risk of injuries to individuals when the drugs were ingested;

11 k. failing to provide adequate and accurate training and information to  
12 the sales representatives who sold Bextra;

13 l. failing to provide adequate and accurate training and information to  
14 healthcare providers for the appropriate use of Bextra; and

15 m. being otherwise reckless, careless and/or negligent.

16 88. Despite the fact that Defendants knew or should have known that Bextra  
17 caused unreasonable and dangerous side effects which many users would be unable to remedy by  
18 any means, Defendants continued to promote and market Bextra to consumers, including  
19 Plaintiff, when safer and more effective methods of pain relief were available.

20 89. Defendants were, or should have been, had they exercised reasonable care,  
21 in possession of evidence demonstrating that Bextra caused serious side effects. Nevertheless,  
22 they continued to market their products by providing false and misleading information with  
23 regard to the safety and efficacy of Bextra.

24 90. Defendants knew or should have known that consumers such as Plaintiff  
25 would foreseeably suffer injury as a result of their failure to exercise ordinary care as described  
26 above.

27 91. As a result of Defendants' actions, Plaintiff, and the Plaintiff's prescribing  
28 physicians were unaware, and could not have reasonably known or have learned through

1 reasonable diligence, that the Plaintiff had been exposed to the risks identified in this complaint,  
2 and that those risks were the direct and proximate result of Defendants' acts, omissions, and  
3 misrepresentations.

4           92. Defendants were, or should have been had they exercised reasonable care,  
5 in possession of evidence demonstrating that Bextra caused serious side effects. Nevertheless,  
6 they continued to market their products by providing false and misleading information with  
7 regard to the safety and efficacy of Bextra.

8           93. Defendants knew or should have known that consumers such as Plaintiff  
9 would foreseeably suffer injuries as a result of their failure to exercise ordinary care as described  
10 above.

11           94. As a direct and proximate consequence of Defendants' acts, omissions, and  
12 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has  
13 required and will require healthcare and services; has incurred and will continue to incur medical  
14 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the  
15 future; has suffered and will continue to suffer mental anguish, diminished capacity for the  
16 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of  
17 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's  
18 direct medical losses and costs include care for hospitalization, physician care, monitoring,  
19 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

20           95. Defendants' conduct was committed with knowing, conscious, wanton,  
21 willful, and deliberate disregard for the value of human life and the rights and safety of  
22 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so  
23 as to punish Defendants and deter them from similar conduct in the future.

24           96. WHEREFORE, Plaintiff demands judgment against Defendants and seeks  
25 compensatory damages, and exemplary and punitive damages together with interest, the costs of  
26 suit and attorneys' fees and such other and further relief as this Court deems just and proper.

27  
28

1                   **SECOND CLAIM FOR RELIEF:**  
 2                   **Strict Liability – Defective Design and Failure to Warn**

3                 97. Plaintiff incorporates by reference all previous paragraphs of this  
 4                 Complaint as if fully set forth herein and further alleged as follows:

5                 98. At all times relevant to this action, Defendants were suppliers of Bextra,  
 6                 placing the drug into the stream of commerce. Bextra was expected to and did reach Plaintiff  
 7                 without substantial change in the condition in which it was manufactured and sold.

8                 99. Bextra was unsafe for normal or reasonably anticipated use.

9                 100. Bextra was defective in design or formulation because when it left the  
 10               hands of the manufacturer and/or supplier, it was unreasonably dangerous and more dangerous  
 11               than an ordinary consumer would expect. Bextra was also defective and unreasonably dangerous  
 12               in that the foreseeable risk of injuries from Bextra exceeded the benefits associated with the  
 13               design and/or formulation of the product.

14                 101. At all times material hereto, Bextra was sold, marketed, distributed,  
 15               supplied, manufactured and/or promoted by the Defendant, in a defective and unreasonably  
 16               dangerous condition at the time it was placed in the stream of commerce in ways which include,  
 17               but are not limited to, one or more of the following particulars.

18                 102. When placed in the stream of commerce, the drug contained unreasonably  
 19               dangerous design defects and was not reasonably safe as intended to be used, subjecting  
 20               Plaintiff's Plaintiff to risks which exceeded the benefits of the drug:

21                   a.         When placed in the stream of commerce, it was defective in design  
 22                 and formulation, making use of the drug more dangerous than an ordinary consumer would  
 23                 expect and more dangerous than other similar drugs;

24                   b.         The drug was insufficiently tested;  
 25                   c.         The drug caused harmful side effects which outweighed any  
 26                 potential utility;

27                   d.         The drug was not accompanied by adequate instructions and/or  
 28                 warnings to fully apprise the consumers, including the Plaintiff, of the full nature or extent of the

1 risks and side effects associated with use, thereby rendering Defendants liable to the Plaintiff and  
2 Plaintiff, individually and collectively, pursuant to the Restatement (Second) of Torts, § 402A, as  
3 adopted by the Named Plaintiff's Home District Courts.

4       103. The drug was defective and unreasonably dangerous when it left the  
5 possession of the Defendants in that it contained warnings insufficient to alert consumers,  
6 including the Plaintiff, to the dangerous risks and reactions associated with the drug, including,  
7 but not limited to, increased risk of cardiovascular events, and other serious and life threatening  
8 side affects.

9       104. The Plaintiff could not have discovered any defect in the drug through the  
10 exercise of care.

11       105. Defendants, as manufacturers of a prescription drug, are held to the level of  
12 knowledge of an expert in the field.

13       106. Bextra as manufactured and supplied by Defendants was also defective due  
14 to inadequate warnings, and/or inadequate clinical trials, testing and study, and inadequate  
15 reporting regarding the results of the clinical trials, testing and study. Defendants failed to  
16 perform adequate testing before exposing Plaintiff to the medication, testing which would have  
17 shown that Bextra had the potential to cause serious side effects including strokes like that which  
18 affected Plaintiff.

19       107. Bextra as manufactured and supplied by Defendants was defective due to  
20 inadequate post-marketing warnings or instructions because, after Defendants knew or should  
21 have known of the risk of injuries from Bextra, they failed to provide adequate warnings to the  
22 medical community and the consumers, to whom they were directly marketing and advertising  
23 Bextra; and, further, it continued to affirmatively promote Bextra as safe and effective.

24       108. Bextra was manufactured, distributed, tested, sold, marketed, advertised  
25 and promoted defectively by Defendants, and as a direct and proximate cause of Defendants'  
26 defective design of Bextra, Plaintiff used Bextra rather than other safer and cheaper NSAIDs. As  
27 a result, Plaintiff suffered the personal injuries described above.

1           109. Information given by Defendants to the medical community and to the  
2 consumers concerning the safety and efficacy of Bextra, especially the information contained in  
3 the advertising and promotional materials, did not accurately reflect the potential side effects of  
4 Bextra.

5           110. Defendants had a continuing duty to warn the Plaintiff of the dangers  
6 associated with the drug.

7           111. Had adequate warnings and instructions been provided, Plaintiff would not  
8 have taken Bextra, and would not have been at risk of the harmful side effects described herein.

9           112. Defendants acted with conscious and deliberate disregard of the  
10 foreseeable harm caused by Bextra.

11           113. Defendants were, or should have been had they exercised reasonable care,  
12 in possession of evidence demonstrating that Bextra caused serious side effects. Nevertheless,  
13 they continued to market their products by providing false and misleading information with  
14 regard to the safety and efficacy of Bextra.

15           114. Defendants knew or should have known that consumers such as Plaintiff  
16 would foreseeably suffer injuries as a result of their failure to exercise ordinary care as described  
17 above.

18           115. As a direct and proximate consequence of Defendants' acts, omissions, and  
19 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has  
20 required and will require healthcare and services; has incurred and will continue to incur medical  
21 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the  
22 future; has suffered and will continue to suffer mental anguish, diminished capacity for the  
23 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of  
24 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's  
25 direct medical losses and costs include care for hospitalization, physician care, monitoring,  
26 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

27           116. Defendants' conduct was committed with knowing, conscious, wanton,  
28

willful, and deliberate disregard for the value of human life and the rights and safety of consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish Defendants and deter them from similar conduct in the future.

117. WHEREFORE, Plaintiff demands judgment against Defendants and seeks compensatory damages, and exemplary and punitive damages together with interest, the costs of suit and attorneys' fees and such other and further relief as this Court deems just and proper.

**THIRD CLAIM FOR RELIEF:**  
**Breach of Express Warranty**

118. Plaintiff incorporates by reference all of the paragraphs of this Complaint as if fully set forth herein.

119. Defendants expressly represented to Plaintiff and other consumers and the medical community that Bextra was safe and fit for its intended purposes, that it was of merchantable quality, that it did not produce any dangerous side effects, particularly any unwarned-of side effects, and that it was adequately tested.

120. These warranties came in the form of:

a. Defendants' public written and verbal assurances of the safety and efficacy of Bextra;

b. Press releases, interviews and dissemination via the media of promotional information, the sole purpose of which was to create an increased demand for Bextra, which failed to warn of the risk of injuries inherent to the ingestion of Bextra, especially to the long-term ingestion of Bextra;

c. Verbal and written assurances made by Defendants regarding Bextra and downplaying the risk of injuries associated with the drug;

d. False and misleading written information, supplied by Defendants, and published in the Physician's Desk Reference on an annual basis, upon which physicians relied in prescribing Bextra during the period of Plaintiff's ingestion of Bextra, and;

e. advertisements.

1           121. The documents referred to above were created by and at the direction of  
2 Defendants.

3           122. Defendants knew or had reason to know that Bextra did not conform to  
4 these express representations in that Bextra is neither as safe nor as effective as represented, and  
5 that Bextra produces serious adverse side effects.

6           123. Bextra did not and does not conform to Defendants' express  
7 representations because it is not safe, has numerous and serious side effects, including unwarned-  
8 of side effects, and causes severe and permanent injuries.

9           124. Plaintiff, other consumers, and the medical community relied upon  
10 Defendants' express warranties.

11          125. Defendants were, or should have been had they exercised reasonable care,  
12 in possession of evidence demonstrating that Bextra caused serious side effects. Nevertheless,  
13 they continued to market their products by providing false and misleading information with  
14 regard to the safety and efficacy of Bextra.

15          126. Defendants knew or should have known that consumers such as Plaintiff  
16 would foreseeably suffer injuries as a result of their failure to exercise ordinary care as described  
17 above.

18          127. As a direct and proximate consequence of Defendants' acts, omissions, and  
19 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has  
20 required and will require healthcare and services; has incurred and will continue to incur medical  
21 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the  
22 future; has suffered and will continue to suffer mental anguish, diminished capacity for the  
23 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of  
24 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's  
25 direct medical losses and costs include care for hospitalization, physician care, monitoring,  
26 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

27          128. Defendants' conduct was committed with knowing, conscious, wanton,

1 willful, and deliberate disregard for the value of human life and the rights and safety of  
 2 consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so  
 3 as to punish Defendants and deter them from similar conduct in the future.

4 WHEREFORE, Plaintiff demands judgment against Defendants and seeks  
 5 compensatory damages, and exemplary and punitive damages together with interest, the costs of  
 6 suit and attorneys' fees and such other and further relief as this Court deems just and proper.

7 **FOURTH CLAIM FOR RELIEF:**  
 8 **Breach of Implied Warranty**

9 130. Plaintiff incorporates by reference all of the paragraphs of this Complaint  
 10 as if fully set forth herein.

11 131. Defendants manufactured, distributed, advertised, promoted, and sold  
 12 Bextra.

13 132. At all relevant times, Defendants knew of the use for which Bextra was  
 14 intended and impliedly warranted the product to be of merchantable quality and safe and fit for  
 15 such use.

16 133. Defendants were aware that consumers, including Plaintiff, would use  
 17 Bextra for treatment of pain and inflammation and for other purposes.

18 134. Plaintiff and the medical community reasonably relied upon Defendants'  
 19 judgment and expertise to only sell them or allow them to prescribe Bextra only if it was indeed  
 20 of merchantable quality and safe and fit for its intended use. Consumers, including Plaintiff, and  
 21 the medical community, reasonably relied upon Defendants' implied warranty for Bextra.

22 135. Bextra reached consumers, including Plaintiff, without substantial change  
 23 in the condition in which it was manufactured and sold by Defendants.

24 136. Defendants breached their implied warranty to consumers, including  
 25 Plaintiff; Bextra was not of merchantable quality or safe and fit for its intended use.

26 137. Defendants were, or should have been had they exercised reasonable care,  
 27 in possession of evidence demonstrating that Bextra caused serious side effects. Nevertheless,

they continued to market their products by providing false and misleading information with regard to the safety and efficacy of Bextra.

138. Defendants knew or should have known that consumers such as Plaintiff would foreseeably suffer injuries as a result of their failure to exercise ordinary care as described above.

139. As a direct and proximate consequence of Defendants' acts, omissions, and misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has required and will require healthcare and services; has incurred and will continue to incur medical and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the future; has suffered and will continue to suffer mental anguish, diminished capacity for the enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's direct medical losses and costs include care for hospitalization, physician care, monitoring, treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

140. Defendants' conduct was committed with knowing, conscious, wanton, willful, and deliberate disregard for the value of human life and the rights and safety of consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish Defendants and deter them from similar conduct in the future.

141. WHEREFORE, Plaintiff demands judgment against Defendants and seeks compensatory damages, and exemplary and punitive damages together with interest, the costs of suit and attorneys' fees and such other and further relief as this Court deems just and proper.

**FIFTH CLAIM FOR RELIEF:**  
**Fraudulent Misrepresentation & Concealment**

142. Plaintiff incorporates by reference all of the paragraphs of this Complaint as if fully set forth herein.

143. Defendants' superior knowledge and expertise, their relationship of trust and confidence with doctors and the public, their specific knowledge regarding the risks and dangers of Bextra, and their intentional dissemination of promotional and marketing information

1 about Bextra for the purpose of maximizing its sales, each gave rise to the affirmative duty to  
2 meaningfully disclose and provide all material information about Bextra's risks and harms to  
3 doctors and consumers.

4           144. Defendants made fraudulent affirmative misrepresentations with respect to  
5 Bextra in the following particulars:

6               a.     Defendants represented through their labeling, advertising,  
7 marketing materials, detail persons, seminar presentations, publications, notice letters, and  
8 regulatory submissions that Bextra had been tested and found to be safe and effective for the  
9 treatment of pain and inflammation; and

10              b.     Defendants represented that Bextra was safer than other alternative  
11 medications.

12           145. Defendants made affirmative misrepresentations; and fraudulently,  
13 intentionally and/or recklessly concealed material adverse information regarding the safety and  
14 effectiveness of Bextra.

15           146. Defendants made these misrepresentations and actively concealed adverse  
16 information at a time when Defendants knew or had reason to know that Bextra had defects and  
17 was unreasonably dangerous and was not what Defendants had represented to the medical  
18 community, the FDA and the consuming public, including Plaintiff.

19           147. Defendants omitted, suppressed and/or concealed material facts concerning  
20 the dangers and risk of injuries associated with the use of Bextra including, but not limited to, the  
21 cardiovascular, cerebrovascular, and other serious health risks. Furthermore, Defendants'  
22 purpose was willfully blind to, ignored, downplayed, avoided, and/or otherwise understated the  
23 serious nature of the risks associated with the use of Bextra in order to increase its sales.

24           148. The representations and concealment were undertaken by Defendants with  
25 an intent that doctors and patients, including Plaintiff, rely upon them.

26           149. Defendants' representations and concealments were undertaken with the  
27 intent of defrauding and deceiving Plaintiff, other consumers, and the medical community to  
28 induce and encourage the sale of Bextra.

1           150. Defendants' fraudulent representations evinced their callous, reckless,  
2 willful, and depraved indifference to the health, safety, and welfare of consumers, including  
3 Plaintiff.

4           151. Plaintiff's physician and Plaintiff relied on and were induced by  
5 Defendants' misrepresentations, omissions, and/or active concealment of the dangers of Bextra in  
6 selecting Bextra treatment.

7           152. Plaintiff and the treating medical community did not know that the  
8 representations were false and were justified in relying upon Defendants' representations.

9           153. Had Plaintiff been aware of the increased risk of side effects associated  
10 with Bextra and the relative efficacy of Bextra compared with other readily available  
11 medications, Plaintiff would not have taken Bextra.

12           154. Defendants were, or should have been had they exercised reasonable care,  
13 in possession of evidence demonstrating that Bextra caused serious side effects. Nevertheless,  
14 they continued to market their products by providing false and misleading information with  
15 regard to the safety and efficacy of Bextra.

16           155. Defendants knew or should have known that consumers such as Plaintiff  
17 would foreseeably suffer injuries as a result of their failure to exercise ordinary care as described  
18 above.

19           156. As a direct and proximate consequence of Defendants' acts, omissions, and  
20 misrepresentations described herein, the Plaintiff, sustained serious cardiovascular injuries; has  
21 required and will require healthcare and services; has incurred and will continue to incur medical  
22 and related expenses; has suffered loss of wages and a diminished capacity to earn wages in the  
23 future; has suffered and will continue to suffer mental anguish, diminished capacity for the  
24 enjoyment of life, a diminished quality of life, increased risk of premature death, aggravation of  
25 preexisting conditions and activation of latent conditions, and other such damages. Plaintiff's  
26 direct medical losses and costs include care for hospitalization, physician care, monitoring,  
27 treatment, medications, and supplies. Plaintiff will continue to incur such losses in the future.

28           157. Defendants' conduct was committed with knowing, conscious, wanton,

willful, and deliberate disregard for the value of human life and the rights and safety of consumers, including Plaintiff, thereby entitling Plaintiff to punitive and exemplary damages so as to punish Defendants and deter them from similar conduct in the future.

158. WHEREFORE, Plaintiff demands judgment against Defendants and seeks compensatory damages, and exemplary and punitive damages together with interest, the costs of suit and attorneys' fees and such other and further relief as this Court deems just and proper.

**SIXTH CLAIM FOR RELIEF**  
**(Unjust Enrichment)**

159. Plaintiff incorporates by reference all previous paragraphs of this  
Complaint as if fully set forth herein.

160. At all times relevant to this action, Defendants were the manufacturers, sellers, and/or suppliers of Bextra.

161. Plaintiff paid for Bextra for the purpose of managing pain safely and effectively.

162. Defendants have accepted payment from Plaintiff for the purchase of  
Bextra.

163. Plaintiff did not receive the safe and effective pharmaceutical product for which Plaintiff paid.

164. It is inequitable and unjust for Defendants to retain this money because the Plaintiff did not in fact receive the product Defendant represented Bextra to be.

165. WHEREFORE, Plaintiff demands judgment against Defendants and seeks equitable relief, the costs of suit and attorneys' fees, and such other and further relief as this Court deems just and proper.

## **PRAYER FOR RELIEF**

WHEREFORE, Plaintiff requests the following relief:

1. General damages in excess of the jurisdictional amount of this Court;
  2. Consequential damages;

- 1           3. Disgorgement of profits;  
2           4. Restitution;  
3           5. Punitive and exemplary damages;  
4           6. Pre-judgment and post-judgment interest as provided by law;  
5           7. Recovery of Plaintiff's costs including, but not limited to, discretionary  
6 Court costs of these causes, and those costs available under the law, as well as expert fees and  
7 attorneys' fees and expenses, and costs of this action; and  
8           8. Such other and further relief as the Court deems just and proper.
